BINIC ABRASIVE

Company Introduction

BINIC Abrasive CO.,LTD is founded in 2005. We are the professional producer for abrasive products, which covering abrasive wheels, flap disc, wire brush, fibre disc, etc.

We provide High Quality Products and Service to user, let the customer's work be safer, highly effective and protecting the environment. Carries out the ISO 9001 quality control system comprehensively, using international advanced automation production equipment and the well appointed development laboratory to ensure the best quality control and quality assurance together with optimized production pattern.

We produced our products based on EN12413 standard and we have obtained ISO 9001:2000 certificate since 2002 and MPA certificate since 2005. Our products are well appreciated by our several satisfied and loyal customers and be well received in the market.

BSP is a brand name of BINIC Abrasive CO.,LTD, The BSP range of cutting off and grinding discs for portable and fixed machines provide superior performance in the most stringent working environment. The product range includes state-of-art solutions for cutting-off, grinding, and surface finishing operations on any materials relates to industrial fabrication markets and DIY market.

With this catalogue, BSP makes it quick and easy to select the products you need from our huge range of topquality abrasives. The clear and logical layout in ten productgroups makes it easy for you to find what you are looking for. State-of-the-art manufacturing techniques ensure that our coated abrasives fulfill the most demanding standards of surface finish, long life and stock removal.

CUTTING OFF DISC & GRINDING DISC

FLAP DISC

WIRE BRUSH

FIBRE DISC

Hand sanding

Hand block

Orbital sander

Random orbital sander

Delta sander

Portable belt sander

Angle grinder

Angle grinder with abrasive mop disc

Angle grinder with cup grinding wheel

Petrol powered cutter

Stationary cutting machine

Chop saw

Hand tool belt grinder

Back stand grinding machine

Centreless finishing machine

Through-feed grinding machine

Edge sanding machine

Contour finishing machine

Wall chaser

Joint cutter

Lifting beam with mottling points

Right angle die grinder

Flexible shaft grinder

Petrol powered cutter with clamping device

Pad / stroke sanding machine

Wide belt finishing machine

Drilling machine

Die grinder

Satin finishing machine

Floor-standing grinder

Concave fillet weld grinder

Table saw

Joint router

Stationary cutting machine

Parquet grinders

INDEX

CUTTING OFF DISC & GRINDING WHEEL

- 10 Cutting off disc
- 25 Mini Cutting Off Disc
- 26 Cutting & Grinding Disc
- 27 Grinding Wheel
- 31 Large Cut Off Wheel
- 34 Tin Box Set

FLAP DISC

- 40 Aluminium Oxide flap disc
- 42 Zirconia Aluminium flap disc
- 45 Silicon Carbide flap disc
- 47 Ceramic Aluminium Oxide flap disc
- 48 2 in 1-Calcined Alumina flap disc
- 49 Plastic Backing Flap Disc flap disc

WIRE BRUSH

- 54 Crimped Wire Cup Brush
- 55 Twisted Knot Bowl Cup Brush
- 57 Twisted Knot Cup Brush
- 58 Crimped Wire Bevel Brush
- 58 Twisted Knot Bevel Brush
- 59 Twisted Knot Wheel Brush
- 64 Circular brushes for bench wheel
- 65 Circular Brush
- 66 Shaft Mounted Cup Brush
- 71 Accessories

FIBRE DISC

- 74 Aluminium Oxide fibre disc
- 75 Zirconia Alumina fibre disc
- 75 Ceramic Aluminium Oxide fibre disc
- 76 Backing Pad

**CUTTING OFF DISC
&
GRINDING WHEEL**

Product Group

BSP label all cutting off disc and grinding wheel for different application with different colors as follows:

Application	BSP LABEL
G	
Stainless steel Steel	
Stainless Steel (INOX)	
ALU	
CAST IRON	
Stone	

BSP label

Types of resin-bonded grinding wheels

Type	Diagram	Dimensions	Description
T 41		Cutting discs b = (0,8 mm - 4,5 mm) (USA: Type 1)	Straight cutting discs. • Available in diameters from 50 (2 ") to 230 mm (9 ") for freehand applications, • from 300 mm (12 ") to 500 mm (20 ") for use in stationary machines
T 42		Cutting discs b = (0,8 mm - 4,5 mm) (USA: Type 27)	Depressed centre cutting discs. • Available in diameters from 50 (2 ") to 230 mm (9 "), allowed for freehand use.
T 27		Grinding wheels b = (4 mm - 10 mm) (USA: Type 27)	Depressed centre grinding wheels. • Available in diameters from 76 (3 ") to 230 mm (9 "), allowed for freehand use.
T 28		Grinding wheels b = (6 mm - 8 mm) (USA: Type 28)	Depressed centre grinding wheels. • Available in diameters from 76 (3 ") to 230 mm (9 "), allowed for freehand use.

CUTTING OFF DISC & GRINDING WHEEL

Construction and components of resin bonded abrasives discs

0.8mm Cutting Off Disc

Stainless Steel (INOX) / Steel Cutting T41

Features:

- The extra fine cutting disc evolution AS60 V with a thickness of 0.8mm is the right choice for cutting thin-walled profiles and pipes, thin sheet and ropes.
- The extra smooth cutting disc is characterized by its fast and smooth cutting with low contact pressure.
- For thin sheets, steel ropes, thin-walled profiles and pipes made of stainless steel and non-ferrous metals, as well as composite materials.
- Used on angle grinder, diameter of 115 mm and 125mm cutting wheels are more durable for customers.

Product advantages:

- Super-long durability
- High-speed cutting
- No need to change the wheels even for different material's cutting
- Comfortable cutting experience
- Economic

BINIC Article Nr.	Size(mm)	Shape	Specification	Application	Speed	R.P.M.

BE1003	115x0.8x22.23	T41	WA60 V-BF	Stainless Steel (INOX)	80m/s	13300
BE1004	125x0.8x22.23	T41	WA60 V-BF	Stainless Steel (INOX)	80m/s	12200

1.0mm Cutting Off Disc

Metal Cutting T41

Features:

- Used on angle grinder, diameter of 115mm and 125mm cutting wheels are more durable for customers.
- Fast cutting for various materials with Minimum friction and low-calorie output, to reduce the pollution of the material.
- With excellent cutting performance and super-long service life for the application.

Product advantages:

- Super-long durability
- High-speed cutting
- No need to change the wheels even for different material's cutting
- Comfortable cutting experience
- Economic

1.0mm Cutting Off Disc

Stainless Steel (INOX) Cutting T41

Features:

- Used for angle grinder.
- 1.0mm thickness cutting disc can satisfy fast cutting with little burr and offer durability.
- Inox special can fastly cutting different material, minimize friction, increase sharpness, and prevent stainless steel hot corrosion.
- Have the excellent abrasive performance and extra working life in application of stainless steel, obvious advantage among the competition of various brands.
- Have the function of fastly cutting ordinary metal.

BINIC Article Nr.	Size(mm)	Shape	Specification	Application	Speed	R.P.M.

BE1008	125x1.0x22.23	T41	AS60 T-BF	SS/S	80m/s	12200

Aluminium Cutting T41

Features:

- Aluminium is used for cutting various profiles, make no pollution and surface damage.
- Increasing feed pressure avoids the safety hazard made by fracture when cutting
- Prevent slow cutting or unable cutting made by air hole blocking when cutting.
- Maximize the friction and sharpness, cost less than diamond blade.
- 1.0mm thickness widely used for various cutting, less dust when cutting.

BINIC Article Nr.	Size(mm)	Shape	Specification	Application	Speed	R.P.M.
BE1011	115x1.0x22.23	T41	CA 60 ALU	Alu	80m/s	13300

1.6-2.0mm Cutting Off Disc - Fe/S/Cl ≤ 0,1%

Stainless Steel (INOX) / Steel Cutting T41 / T42

Features:

- Free from iron, sulphur and chlorine. Special disc for cutting stainless steel. For food industrial.
- Used for 4" 4 1/2" 5" 6" 7" 9" grinder, 4" 4 1/2" 5" 6" 7" 9" diameter products are suit to America market.
- .045" thickness can fastly cut different material, minimize the friction and increase side sharpness.
- .062" thickness widely used for various cutting application. Increase side strength to ensure safer application.
- Has perfect abrasive performance and extra durability on application of steel, obvious advantage among the competition of various brands.

2.5-3.0mm Series

Stainless Steel (INOX) / Steel Cutting T41

Features:

- Used for angle grinder.
- Can fastly cutting different material, minimize friction, increase sharpness, and prevent stainless steel hot corrosion.
- 2.5mm&3.0mm thickness widely used for various cutting application. Increase side strength to ensure safer application. Improve the side stability and guarantee guide precision of cutting disc.
- Have the excellent abrasive performance and extra working life in application of stainless steel, obvious advantage among the competitive of various brands.

Metal Cutting

T41

Features:

- Used on angle grinder.
- Fast cutting for various materials with Minimum friction and low-calorie output, to reduce the pollution of the material.
- With excellent cutting performance and super-long service life for the application.

Product advantages:

- Super-long durability.
- High-speed cutting.
- No need to change the wheels even for different material's cutting.
- Comfortable cutting experience.

2.5-3.0mm Series

Metal Cutting T42

Features:

- Used on angle grinder.
- Fast cutting for various materials with Minimum friction and low-calorie output, to reduce the pollution of the material.
- With excellent cutting performance and super-long service life for the application.

Product advantages:

- Super-long durability
- High-speed cutting
- No need to change the wheels even for different material's cutting
- Comfortable cutting experience

2.5-3.0mm Series

Stone Cutting T41

Features

- Substitute products of diamond cutting wheel for concrete. Used for cutting various stone materials, No pollution and damage on work-piece surface after cutting.
- Feed pressure is increased to avoid potential safety hazard caused by fracture when cutting.
- Cutting for various section bars. No pollution and damage on work-piece surface after cutting.
- Prevent the products from clogging pores to cause slow cutting or unable to cut.
- Maximize the friction to improve sharpness, More cost saving than cutting by alloy blade.
- Smooth and flexible handle for cutting steel with various steel shapes.

Product advantages

- Fine Durability
- Tiy Dust
- Glossy cutting surface
- No Clogging
- Economic

Mini Cutting Off Disc

Stainless Steel (INOX) / Steel Cutting T41

Features

- Can fastly cutting different material, minimize friction, increase sharpness, and prevent Stainless steel hot corrosion.
- Application. Improve the side stability and guarantee guide precision of cutting disc.
- Have the excellent abrasive performance and extra working life in application of stainless steel, Obvious advantage among the competition of various brands.
- Have the function of fastly cutting ordinary metal.

Product advantages

- Extra durability
- High-speed cutting
- High-break-resistance
- Comfortable cutting Experience
- Economic

Cutting & Grinding Disc

Stainless Steel (INOX) / Steel Cutting T41

Features:

- Designed and manufactured to perform both cutting and grinding.
- Very uniform, high density grain structure is extremely durable and self sharpening for long life and cooler cut.
- Available in 1.9mm, 2.5mm thickness when you need to cut, notch and grind.
- They are specially reinforced to withstand the stress in off-hand cutting applications, so whether you are cutting, grooving, notching or doing some occasional light grinding, these wheels are guaranteed to provide the longest wheel life, fastest material removal and maximum safety.
- Hold their cutting edge longer to give you a cutting life beyond compare.
- Equipped with an exclusive metal hub cladding for extra strength and control.

Grinding Wheel

Metal Grinding T27

Features:

- Used for medium/high power angle machines, display the best performance.
- Used for high stress working, excellent abrasive performance, high stability in grinding pipe.
- Metal grinding disc provides a high burr removal capability of the general types of iron and steel to give maximum performance and long life.
- Metal grinding especially profile plates, rebar and steel structures, such as iron and steels. It's generally used in surface grinding, rust removal, welding burrs also in processes like grinding of corners and burring after iron foundry operations.
- Perfect abrasive performance and extra durability on application of steel.

Grinding Wheel

Cast Iron Grinding T27

Features:

- Substitute products of diamond cutting wheel for cast iron. Used for cutting various stone materials, No pollution and damage on work-piece surface after cutting.
- Feed pressure is increased to avoid potential safety hazard caused by fracture when cutting.
- Cutting for various section bars. No pollution and damage on work-piece surface after cutting.
- Prevent the products from clogging pores to cause slow cutting or unable to cut.
- Maximize the friction to improve sharpness, More cost saving than cutting by alloy blade.
- Smooth and flexible handle for cutting steel with various steel shapes.

Product advantages:

- Fine Durability

Alu Grinding T27

Features:

- Aluminium is used for cutting various profiles, make no pollution and surface damage.
- Increasing feed pressure avoids the safety hazard made by fracture when cutting
- Prevent slow cutting or unable cutting made by air hole blocking when cutting.
- Maximize the friction and sharpness, cost less than diamond blade.
- 6.0mm thickness widely used for various cutting, less dust when cutting.

Large Cut Off Wheel For Stationary Machine

For steel in 3-5KW 100m/s

Features:

- Used for fixed cutting machine, 3.5mm thickness, offer users more durability, suitable for most high requirement customers.
- Maximize the friction and sharpness, reduce the burrs after cutting.
- Various cutting applications, increase side strength to ensure safer application.
- Has perfect abrasive performance and extra durability on application of steel.

Product advantages:

- Superior Durability
- High break-resistance
- Economic
- Ultrahigh cutting speed
- Comfortable cutting experience
- No block

BINIC Article Nr.	Size(mm)	Specificatio	Speed

BE1206	400 x 4.0 x 25.4	A30 R-BF	100m/s

For steel under 3KW 80m/s

Features:

- Used for 2.5mm thickness, offer users more durability, suitable for most high requirement customers.
- Maximize the friction and sharpness, reduce the burrs after cutting.
- Various cutting applications, increase side strength to ensure safer application.
- Has perfect abrasive performance and extra durability on application of steel.

Product advantages:

- Superior Durability
- High break-resistance
- Economic
- Ultrahigh cutting speed
- Comfortable cutting experience
- No block

Tin box set

■ For disc 115mm and 125mm with thickness 0.8mm,10mm, can be piped in the shelf of tool supermarket.

Plastic Box Set

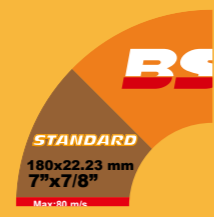

■ For disc 115mm with thickness 125mm and 0.8mm,1.0mm

FLAP DISC

Product Group

BSP offers four integrated product groups, For each user and application we offer the right flap disc. All flap disc are manufactured according to the applicable standards and guarantee the highest degree of safety.

Application	ECO	STANDARD	PROFESSIONAL	MAX
METAL		 <p>STANDARD 180x22.23 mm 7"x7/8" Max: 80 m/s</p>	 <p>PRO 180x22.23 mm 7"x7/8" Max: 80 m/s</p>	
Stainless Steel (INOX)	 <p>ECO 180x22.23 mm 7"x7/8" Max: 80 m/s</p>	 <p>STANDARD 180x22.23 mm 7"x7/8" Max: 80 m/s</p>	 <p>PRO 180x22.23 mm 7"x7/8" Max: 80 m/s</p>	
	 <p>ECO plus 180x22.23 mm 7"x7/8" Max: 80 m/s</p>	 <p>STANDARD plus 180x22.23 mm 7"x7/8" Max: 80 m/s</p>	 <p>PRO plus 180x22.23 mm 7"x7/8" Max: 80 m/s</p>	 <p>MAX 180x22.23 mm 7"x7/8" Max: 80 m/s</p>
STONE		 <p>STANDARD 180x22.23 mm 7"x7/8" Max: 80 m/s</p>	 <p>PRO 180x22.23 mm 7"x7/8" Max: 80 m/s</p>	
		 <p>STANDARD plus 180x22.23 mm 7"x7/8" Max: 80 m/s</p>	 <p>PRO plus 180x22.23 mm 7"x7/8" Max: 80 m/s</p>	

Flap Material

Label

Aluminium Oxide - Metal Grinding STANDARD

Features

- Mild steel, tool steels, plastic, primer, lacquers and wood.
- Cleaning of welding seams, deburring, chamfer, De-rust, preparatory works for lacquer of carbodies, machines, switch boards, tank constructions, sanding of wooden surface such as parquet for furniture.
- Flat and conical flap discs with fiberglass or plastic backing support.
- High performance, durable.

	Article Nr.	Inch	Metric(mm)	Type	Grit

Aluminium Oxide - Metal Grinding

PRO

Features

- High quality Aluminum Oxide grains.
- Strong fiberglass and X-weight cloth backing.
- T29 shape ideal for contour and edge work.
- T27 shape good for working on flat grinding surfaces.
- Available in High Density and Standard Density.
- Used on all ferrous and non-ferrous metals, aluminium for all purpose sanding and grinding, rust removal, light deburring.

Article Nr.	Inch	Metric(mm)	Type	Grit
BF1011	4"x5/8"	100x16	T27/29	A40-120#
BF1012	4.5"x7/8"	115x22.2	T27/29	A40-120#
BF1013	5"x7/8"	125x22.2	T27/29	A40-120#
BF1014	6"x7/8"	150x22.2	T27/29	A40-120#
BF1015	7"x7/8"	180x22.2	T27/29	A40-120#

PRO PLUS

With Increased Flaps Number

Features

- Ensures low build-up of heat in the workpiece even when used with minimum contact pressure on variable-speed angle grinders at low rotational speeds.
- Performs exceptionally well on sheet metal and thin profiles.
- Especially suited for use on stainless steel or cold rolled steels, aluminum oxide flap discs are self-lubricating to avoid over-heating of the work piece. The size coat and top size coat also aid reduced clogging and improve the resulting finish.
- Cool surface grinding, work on weld seams.

Article Nr.	Inch	Metric(mm)	Type	Grit
BF1016	4"x5/8"	100x16	T27/29	A40-120#
BF1017	4.5"x7/8"	115x22.2	T27/29	A40-120#
BF1018	5"x7/8"	125x22.2	T27/29	A40-120#
BF1019	6"x7/8"	150x22.2	T27/29	A40-120#
BF1020	7"x7/8"	180x22.2	T27/29	A40-120#

Zirconia Aluminium - Stainless Steel & Metal

ECO

Features

- Zirconia alumina is a high-performance abrasive delivering optimum stock removal performance on high-powered angle grinders at higher contact pressures.
- Premium zirconium grain on a durable polyester-cotton backing provides fast cutting action and long life.
- Work on steel, stainless steel(inox), weld seams, chamfering, surface grinding on steel.

Article Nr.	Inch	Metric(mm)	Type	Grit
BF1021	4"x5/8"	100x16	T27/29	ZA40-120#
BF1022	4.5"x7/8"	115x22.2	T27/29	ZA40-120#
BF1023	5"x7/8"	125x22.2	T27/29	ZA40-120#
BF1024	6"x7/8"	150x22.2	T27/29	ZA40-120#
BF1025	7"x7/8"	180x22.2	T27/29	ZA40-120#

ECO PLUS

With Increased Flaps Number

Features

- The support of the abrasive band consists of a cotton twill which shows an outstanding removing rate and excellent lifetime - without clogging up.
- The glass fibre backing is characterised by an even grinding finish up to the complete consumption of the abrasive grain. As a result, no scratches on the workpiece will appear.
- Work on steel, stainless steel(inox), weld seams, chamfering, surface grinding on steel.

Article Nr.	Inch	Metric(mm)	Type	Grit

BF1030	7"x7/8"	180x22.2	T27/29	ZA40-120#

Zirconia Aluminium - Stainless Steel & Metal STANDARD

Features

- Fast grinding through constant grinding aggressiveness to the last abrasive grit
- Highest economic value through greater performance per time unit, less wear on the disc and reduced set-up times.
- The greatest possible stock removal
- For use on stainless steel, sheet metal, tool steels, heat-treated steels, and for the grinding & finishing of welds. For aggressive use on heavy duty applications.
- Extremely long tool life.
- Work on steel, stainless steel(inox),weld seams, chamfering,deburring.

Article Nr.	Inch	Metric(mm)	Type	Grit
BF1031	4"x5/8"	100x16	T27/29	ZA40-120#

Zirconia Aluminium - Stainless Steel & Metal PRO

Features

- This abrasive grain is less hard, but very tough, and gives the disc very good all purpose characteristics.
- It is used for such demanding operations as deburring, machining welding seams and breaking edges.
- The glass fibre backing is characterised by an even grinding finish until all of the abrasive grain has been worn away.
- Leaves no scratches on the workpiece.
- Stainless steel, steel, cast

Article Nr.	Inch	Metric(mm)	Type	Grit
BF1041	4"x5/8"	100x16	T27/29	ZA40-120#

With VSM or 3M Flaps

PRO PLUS

With Increased Flaps Number

Features

- The pro plus flap disc is a high-end product for all users who recognise quality. Increased number of lamellas, even more aggressive material removal rate(steeper arrangement of lamellas) and still a higher lifetime than the AZ type.
- Improved tried-and-trusted topquality to optimize the efficiency of your tool.
- Mild steel and stainless steel. For grinding on edges as well as on surfaces.

With VSM or 3M Flaps

Silicon Carbide - Stone Grinding STANDARD

Features

- The standard silicon Carbide features an extremely tough Silicon Carbide abrasive grain.
- The silicon carbide disc is excellent for paint removal, blending/finishing, surface preparation, grinding and polishing.
- Used on marble, granite, stone, concrete.

	Article Nr.	Inch	Metric(mm)	Type	Grit
Standard	BF1051	4"x5/8"	100x16	T27/29	C40-120#

Silicon Carbide - Stone Grinding PRO

Features

- Silicon carbide abrasive offers hardness and durability for use with titanium, fiberglass, plastic, and masonry.
- Provides a high-quality surface finish on hard-to-machine materials.
- Type 27 depressed center flap style is used for surface grinding, edge grinding, and removal of marks from concrete.
- Phenolic resin backing offers durability and reinforcement.
- Threaded hole for attachment to grinding tools.
- Use on marble, granite, stone, concrete.

Ceramic Aluminium Oxide Stainless Steel & Metal

Max

Features

- Significantly improves life, grain retention and fray resistance.
- Cool, noticeably fast cut rate.
- Produced with new technique raw material, stable and extremely high efficiency.
- Very aggressive and consistent, New resin system for high grain retention cut rate Maximum contact with workpiece without loading.
- Fine finishing primarily on flat surfaces.
- Last 50% – 200% longer than any flap discs on stainless steel, cobalt, chrome, Inconel, titanium and other hard-to-grind materials.

Product advantages

- Overlong durability
- High cutting speed
- Comfortable grinding experience
- Burr-free
- Sharp

WIRE BRUSH

Technical Information

Working speed & maximum safe free speeds

Surface speeds in metres per se c.

On each tool you can find the maximum safety turning speed. This speed is important to ensure your safety at work and must not be exceeded. Using angle grinders with an adjustable turning speed allows you to adjust their turning speed to the maximum allowed.

		Brush diameter (in mm)

Standard values:
for crimped wire 30–35 m/sec
for nylon bristle 18–22 m/sec

Recommended brush diameters for angle grinders

		Brush diameter (in mm)											
Ø	Machine outside diameter	60	65	75	80	90	100	115	120	125	150	175	
Wheel brush, knotted							115	115		125	150	180	
Wheel brush, crimped							115	115					
Cup brush, knotted			115	125	150		180						
Cup brush, crimped		115		125	150		180						
Cup brush, abrasive								adjustable					
								150					

Working speed for Ø:

■ Ø 115 mm (4 1/2") 12.500 U/min⁻¹

■ Ø 125 mm (5") 11.000 U/min⁻¹

■ Ø 150 mm (6") 8.500 U/min⁻¹

■ Ø 180 mm (7") 8.500 U/min⁻¹

■ Ø 230 mm (9") 6.500 U/min⁻¹

WIRE BRUSH

Wires

S

Soft

B-Brass Wire

Straight crimped diameter 0.06mm to 0.50mm

SS

Medium

S-Steel wire

Natural hard, crimped, diameter 0.06mm to 0.80mm

S-T

BS-Brass coated steel wire

Single wire, springy, crimped or straight. Diameter 0.15mm to 0.38mm

BS

SS-Stainless steel wire

Acid resistant, crimped or straight. Dia. 0.15mm to 1.0mm.

B

Hard

ST-Steel wire

Tempered straight. Diameter 0.3mm to 1.2mm

Crimped Wire Cup Brushes

Features:

- The brushes are ideally suited for use on stationary machines, pneumatic grinders and electric tools.
- We supply them with a threaded or plain arbor hole to suite your machines.

Fill type:

- S-Steel wire
- BS-brass coated steel wire
- SS-stainless steel wire
- B-Brass wire

Application:

- Cleaning prior to welding, rust and paint removal, weld spatter, and corrosion removal surface ships, metal surface, light and medium duty cleaning.

Twisted Knot Bowl Cup Brushes

Features:

- The support ring of this special design prevents excessive spreading of the fill material.
- This is especially useful when deburring flat surfaces, since a greater number of bristle tips then act on the workpiece.
- The TS-Special when used with an orbital action will make short work of all burrs.

Fill type:

- ST-Steel wire
- SS-stainless steel wire

Application:

- Heavy duty, cleaning of large metal surface, weld scale and corrosion removal.
- Pre-paint surface preparation.
- Ideal for cleaning welds and fabricated steelworks.

Twisted Knot Cup Brushes

Features:

- Heavy duty and efficiently on a variety of cleaning.
- The steel supported rings reduce the wire flare and have more aggressive effect

Fill type:

- ST-Steel wire
- SS-stainless steel wire

Application:

- For heavy-duty use such as the removal of paint, scale, corrosion of all kinds and the cleaning of all kinds and cleaning of weld seams and spot-welds.
- Single twists, oil-hardened wire-the features with give these brushes their aggressive action.

Crimped Wire Bevel Brushes

Fill type:

- S-Steel wire
- BS-brass coated steel wire
- SS-stainless steel wire
- B-Brass wire

Application:

- Heavy/duty work such as the removal of paint, scale and corrosion of all kinds.
- Design particularly suitable for work on internal corners, using a one-hand and large angle ginder.

Circular Brush

Fill type:

- S-Steel wire
- BS-brass coated steel wire
- SS-stainless steel wire

Application:

- Applications include rust and paint removal, deburring, descaling, matt finishing and.

Fill type:

- S-Steel wire
- BS-brass coated steel wire
- SS-stainless steel wire

Application:

- Creating metallicly clean surfaces.
- Cleaning tool dies.
- Deburring casting.
- Matt finishing of metal surfaces.

Shaft Mounted Cup Brushes

Shaft Mounted Cup Brushes Crimped Wire

Fill type:

- S-Steel wire
- BS-brass coated steel wire
- SS-stainless steel wire
- B-Brass wire

Application:

- Cup brushes with shaft are small diameter brushes and good to be used for drill machines. Normally the RPM is 4500. It's good for home work and do-it-yourself works. We have inch size and metric size for your choose. It's very flexible and most popular in use.

FIBRE DISC

Fibre Discs

BSP fibre discs have high material removal rates and service lives and produce an optimal finish. Suitable backing plates complete the product range. Areas of use are steel, stainless steel, non-ferrous metal and select the right tool for every application. Even the most difficult of surfaces can be worked on easily with the fibre discs.

BSP abrasive fibre discs are outstanding for rough grinding and sanding, de-rusting metal parts, de-burring and grinding welded seams. These discs are also suitable for precision finishing work on metals.

Hole pattern for fibre discs

Round hole

Cross hole

Materials and applications

Aluminium Oxide for S:
For working on steel and NF metals.

Zirconia Alumina for SS/S:
High removal rate for rough grinding and deburring of steel and stainless steel.

Aluminium Oxide for SS:
For processing stainless steel.
High aggressiveness and long service life due to new advanced coating technology.

Silicon Carbide for ST:
For working on stone and concrete.

Fibre Disc Aluminium Oxide For Metal For working on steel and NF metals

W915	180mm(7")	M14x2
		5/8"-11NC
		M16x2

Advantage: Medium hard backing pad allows good adaptation to the workpiece/ For universal use, especially for surface and finish grinding (grit 50 and finer) / High temperature resistance.

Plastic backing pad ripped

Advantage: High performance backing pad with radially extending ribs/ Medium hard rubber for aggressive stock removal. Ripped pads result in cooler running of the discs.
